

Project Design Phase-I Solution Architecture

Date	27 October 2023
Team ID	NM2023TMID04531
Project Name	Create a Google My Business Profile

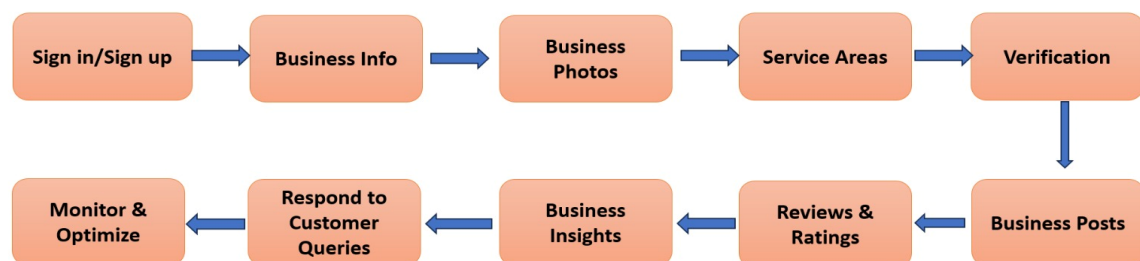

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

Solution Architect For Google My Business Profile

Description

Google My Profile is an integral part of the Google ecosystem, offering users a platform to manage and curate their personal information and online identity. Data accuracy and authenticity are maintained through validation and verification mechanisms. Stringent compliance with data protection regulations and Google's governance standards is ensured. The architecture is designed for high scalability and redundancy, complemented by data recovery measures, guaranteeing uninterrupted service availability.
